**The new Figures Advent Calendar
will be released in September 2026!**

'Every Year Again'

Figures Advent Calendar for H0, TT, N and Z Gauges

Our Figures Advent Calendar has a long tradition. It has been bringing joy to model railway enthusiasts during Advent for many years. Behind each door is a model railway figure in your gauge, as the Advent Calendar with hand-painted figures is available for H0, TT and N gauges. Since 2025, there has even been a calendar with colour-printed 3D Master Figures for Z gauge. Of course, we change the selection of figures every year to bring variety to your model landscape.

Expected release: September 2026

Every day, look forward
to your hobby!

For More Enjoyment of Your Hobby

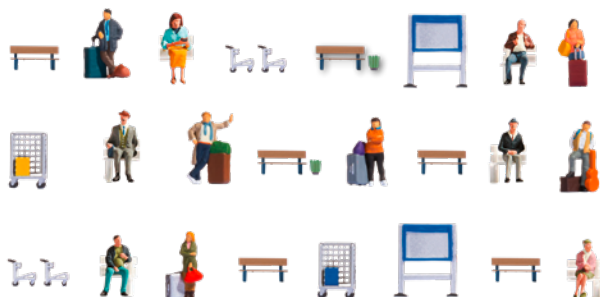

Decorative Advent Calendar 'On the Platform'

Who isn't familiar with the stress in the weeks leading up to Christmas? Buying presents for your loved ones, filling the fridge for the festivities, finishing everything at work, and so on and so forth... Once again, your hobby gets neglected. This makes us look forward even more to the quiet days after Christmas, when we have time for our families and our hobbies.

With the Decorative Advent Calendar from NOCH, this anticipation begins on 1st December. Behind each door are hand-painted figures and accessories to perfectly decorate your platform. We have selected the products so that they fit any layout. This way, you can enjoy your hobby from the very first day of Advent.

Expected release: September 2026

65593 Decorative Advent Calendar 'On the Platform'

Contents: 24 hand-painted figures and accessories

Themed Figures Sets HO

This year, we are expanding our popular Themed Figures Sets with six new sets. The Themed Figures Sets are taken from real life and are therefore ideal for depicting small, self-contained scenes. You may be interested to know that at

www.noch.com you will find remarkable references to other matching products that are suitable for creating realistic scenes.

Expected release: October 2026

Themed Figures Set 'THW Flood Relief Operation'

Unfortunately, we know this scenario all too well, as the floods of recent years have painfully demonstrated that the work of the Federal Agency for Technical Relief is indispensable, protecting not only human lives but also our possessions. With this set, you can create a realistic emergency scene. At www.noch.com, you will find many more products for designing the scene.

HO 16258 Themed Figures Set 'THW Flood Relief Operation'
Contents: 5 THW figures, 1 emergency power generator, 1 mobile pump, 1 submersible pump, 1 hose, 6 sandbags

Themed Figures Set 'Fire Brigade Operation'

Almost every day, we hear the sirens when the fire brigade is called out to extinguish a fire or rescue someone. You can recreate such operations perfectly in your model with the Themed Figures Set 'Fire Brigade Operation', because in addition to the firefighters, the set contains lots of accessories such as floodlights, ladders, spreaders and hoses, enabling you to design a realistic scene.

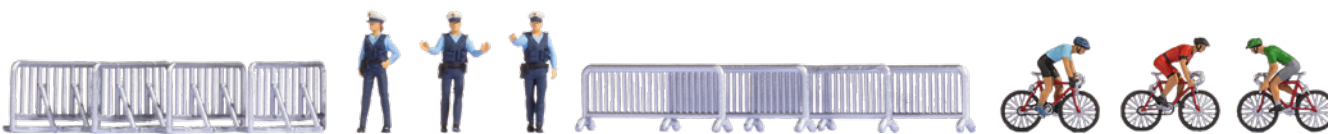

HO 16259 Themed Figures Set 'Fire Brigade Operation'
Contents: 5 firefighter figures, 1 floodlight, 1 hydraulic unit, 2 ladders, 2 hoses, 1 pair of cutters, 1 spreader, 1 extinguisher, 2 hydrants, 1 jet pipe, 1 pipe

Themed Figures Set 'Cycling Race'

Who will win the race? With this Themed Figures Set, you can recreate an exciting cycling race in miniature. The contents of the set are particularly suitable for staging the finish line. Three racing cyclists battle for victory, while three police men secure the route with barriers. At www.noch.com, you will find many more accessories, from camera crews to spectators.

HO 16290 Themed Figures Set 'Cycling Race'
Contents: 3 racing cyclists, 3 police men, 8 barriers

Themed Figures Set 'Christmas'

For most children, it is the highlight of the year, and many adults feel the same way: Christmas, the family celebration with all its rituals and traditions. The set contains everything you need to create a wonderful Christmas scene in miniature, from presents and Father Christmas to a cute dog with elk antlers.

HO 16291 Themed Figures Set 'Christmas'

Contents: 2 men with gifts, 1 Father Christmas, 1 woman in an armchair, 1 child on a wooden horse, 1 dog with elk antlers, 1 pile of gifts, 1 sleigh with gifts

Themed Figures Set 'Gym'

Once disparagingly referred to as 'muscle mills', fitness studios are now an integral part of healthy living. Three male and two female models work hard on various training equipment. From cross trainers and ergometers to barbells and dumbbells, the set contains everything you need to improve the physical fitness of your HO figures.

HO 16292 Themed Figures Set 'Gym'

Contents: 1 man bench pressing, 1 man with dumbbells, 1 man on exercise bike, 1 woman on cross trainer, 1 woman at squat rack, 1 cross trainer, 1 exercise bike, 1 dumbbell rack

Themed Figures Set 'Film Set'

A good film requires a great deal of personnel and technical equipment. Director, cameraman, sound assistant, cameras and camera trucks, spotlights and wind machines are just some of the equipment required. With this Themed Figures Set, you can create a model of a crime scene, complete with detectives and a corpse. We recommend our new product (ref. 15071) 'Criminal Police with Corpse' for this.

HO 16293 Themed Figures Set 'Film Set'

Contents: 1 woman with clapperboard, 1 director, 1 cameraman, 1 man with megaphone, 1 sound assistant, 1 lighting technician, 2 cameras, 2 spotlights, 1 wind machine

NOCH Sound Scenes 2.0

NEW

H0 and N

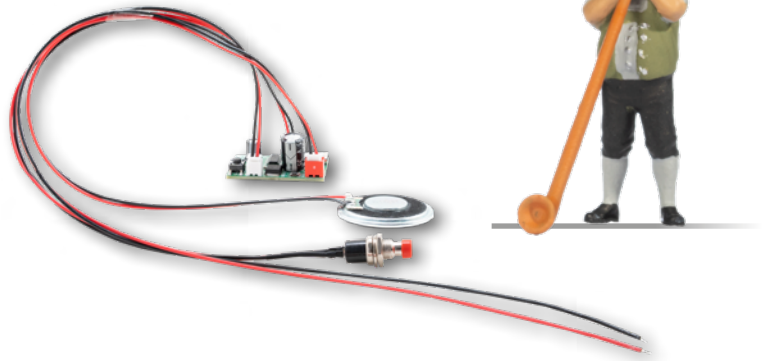

Making something good even better? That's right up our alley! The popular NOCH Sound Scenes have been extensively revised and are now available with improved sound quality and new sounds. We have also designed matching, highly detailed figures that are available exclusively in combination with Sound Scenes 2.0.

All Sound Scenes 2.0 are ready to connect. The sound is triggered by pressing the button. You can choose between simple playback or continuous loop. The volume can be adjusted using the button on the circuit board. The connection is made to a 16 V model railway transformer, direct or alternating current.

Expected release: November 2026

Highlights:

- Improved speaker quality
- Button included
- 2 playback modes
(single play and continuous loop)
- Adjustable volume
- Exclusive figures
- Hand-painted and highly detailed

'boooooom'

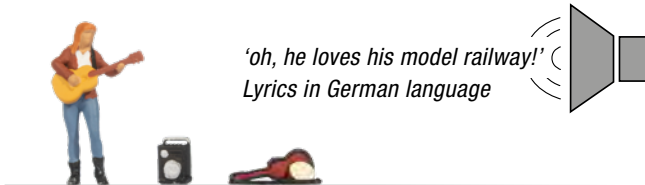

Two alphorn players meet for a duet, and we can't get enough of their impressive instruments. The beautiful music cuts a fine figure in any mountain landscape and invites you to dream ...

Video clip

H0 12822 Sound Scene 2.0 'Alphorn Players'

N 12922 Sound Scene 2.0 'Alphorn Players'

'oh, he loves his model railway!'
Lyrics in German language

Nora Weichenherz hopes that a few euros will jingle in her guitar case. To soften the hearts of passers-by, she sings about her fate. She was in love. But him? He didn't have eyes for Nora, but for his model railway... Heartbreak and smiles are guaranteed with this sound scene!

Video clip

H0 12823 Sound Scene 2.0 'Street Music'

N 12923 Sound Scene 2.0 'Street Music'

'Watch out, tree falling!' echoes through the forest. Before that, the chainsaw roars realistically several times. If you want to set up the matching tree next to the two figures, NOCH offers the micro-motion Falling Tree 'Fir Tree' (ref. 21775), which falls over at the push of a button.

H0 12845 Sound Scene 2.0 'Felling Trees'

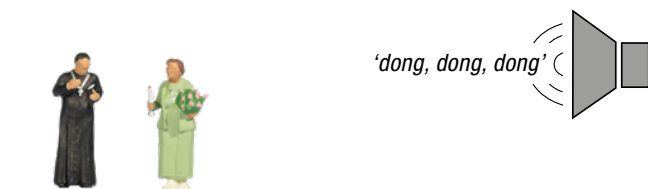

N 12945 Sound Scene 2.0 'Felling Trees'

The sound of cowbells was recorded by the boss himself during a mountain hike, despite his considerable fear of cattle! But that's no use, because we don't want to deprive you of these beautiful sounds for your model landscape. Also featured: the three 'Allgäu beauties' Alma, Betty and Kati!

H0 12858 Sound Scene 2.0 'Cow Bells'

N 12958 Sound Scene 2.0 'Cow Bells'

Now it's striking thirteen! This sound was recorded in front of a real church and is perfect for small chapels or village churches. It adds the finishing touch to your little idyllic world, because the bells ring (almost) like the real thing!

H0 12862 Sound Scene 2.0 'Church Bells'

N 12962 Sound Scene 2.0 'Church Bells'

Relaxed scratching, pecking and clucking – that's how we imagine a peaceful morning in the countryside. At least until the 'animal alarm clock' rings: our rooster crows at the top of his voice! This sound scene is ideal for creating a farm in the countryside or even a small chicken farm in the middle of the urban jungle.

This is How Gifting Works Today: Personal, Loving, Surprising. The NOCH Gift Box

Our new gift boxes are small eye-catchers with a big impact – perfect for anyone who wants to give a personal gift without being cheesy. Each box has a modern design, high-quality finish and feels special to the touch.

The absolute wow factor: inside the lid – visible through a transparent film – is an approx. 2.5 cm tall, hand-painted miniature figure. Each figure is truly unique and depicts the respective occasion in a super cute, creative way: birthdays, weddings, congratulations, get well wishes and much more. Not a mass-produced product, but a mini work of art that immediately wins hearts.

The box itself opens like a small book – smoothly thanks to a magnetic closure that makes a quiet, elegant ‘click’ when closed. Inside the box is a finely crafted recess for your extra gift: a banknote, voucher, piece of jewellery or other small surprise.

And because personal words make all the difference, there is a mini greeting card on the inside of the lid for your message – short, sweet and meaningful.

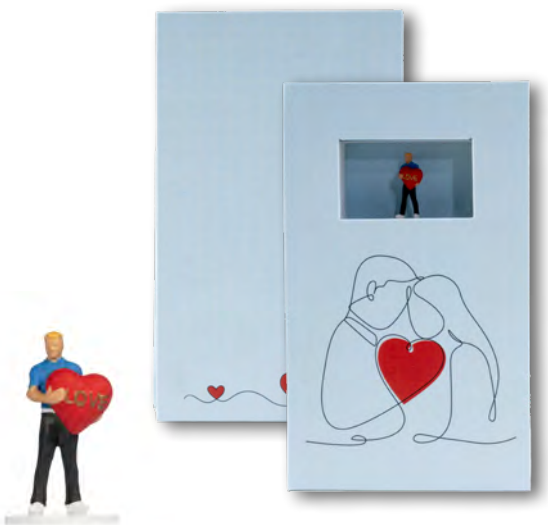

10 occasions. 10 designs. 1,000 ways to make someone really happy.

Giving a personal gift has never been so easy – and so special. Perfect for anyone who wants to give not just a gift, but a memory.

Expected release: May 2026

Motorbikes in 3D Colour Printing

NEW

3D Master Figures for H0 Gauge

Highly detailed motorcycles for H0 layouts and dioramas have been in short supply until now. We can fill this gap thanks to the unique technology of colour 3D printing. Our 3D Master Models are manufactured using a complex 3D printing process that enables us to reproduce complex models with all their details in realistic colours. Look forward to 15 different motorcycle models that will make your model scenes even more realistic in the future. From racing machines to tourers, choppers and café racers to emergency vehicles, there is something for every taste and every situation.

Expected release: November 2026

NEW

Finally Autumn!

Master Trees

For many, it is the most beautiful season of all: golden autumn! The days are getting shorter, the forests are turning colourful and the model-making season is finally starting again!

We asked ourselves why there are so few model landscapes with an autumnal atmosphere. Perhaps it's because there are so few beautiful autumn trees available. That's why we are now releasing

six beautiful, colourful autumn trees in the NOCH Master Series. In addition to the colourful deciduous trees – a stately maple, a delicate birch and an impressive oak – three dainty autumn larch trees will bring colour to your model landscape. Let yourself be inspired by autumn for your next model building project!

Expected release: August 2026

20168 Larch, autumnal
19 cm high

20169 Larch, autumnal
22 cm high

Note:

The Master Trees are not only ideal for model railway enthusiasts of all gauges, but also for designing bases, dioramas and landscapes.

The sizes are interesting, for example, for military model building scales 1:35, 1:48 and 1:72. Car model builders working to scales of 1:24, 1:32 and 1:45 are also sure to find the right tree.

To find out whether a particular tree is suitable for your purposes, please refer to the table on the packaging or the product description on the NOCH website www.noch.com.

Even More Colour with Autumn Bushes

Are you familiar with NOCH Nature Trees (ref. 23100)? Together with the NOCH Autumn Leaf Foliage Set (ref. 07168), you can create your own individual bushes, shrubs and small trees in autumn colours. Spray the Nature Trees with NOCH Spray Adhesive 'Haftfix' (ref. 61151) or Landscaping Spray Glue (ref. 61141). Then fluff up the autumn leaves using the PROFI Shaker (ref. 08099). In no time at all, you can craft a stunning, personalised autumnal scene.

Note: All products shown here are already available at your local dealer and at www.noch.com.

each 50 cm long

For Cosy Hours in the Model Garden!

micro-motion Tree with Hammock H0

The Tree with Hammock is a real highlight and brings a relaxed summer atmosphere to the model.

A hammock is stretched between a high-quality, handcrafted NOCH Master Tree and a filigree 3D-printed stand, in which a woman in a bikini is sleeping. She seems to have fallen asleep while reading, an open book is lying on her leg. A lively, detailed motif that brings peace, joie de vivre and movement to any model landscape.

What makes this model special is that the hammock is movable. An underground motor (installation depth 3.5 cm) moves the hammock realistically. The drive mechanism is supplied as a kit. The electronics, which are also included, are connected to a 16V model railway transformer and are suitable for direct and alternating current. The speed of the hammock's movement can be adjusted on the circuit board.

Expected release: October 2026

H0 21773 micro-motion Tree with Hammock
 Base size: 9.7 cm x 8.1 cm
 Installation depth: 3.5 cm
 Height of tree: 16 cm

Open-Air Staircases for a Special Ambience

The two open staircases can be used to great effect in parks, squares or in front of stately buildings. The staircases are made of hard foam and can therefore be easily modified with craft tools (see page 36 onwards) and adapted

to the installation situation. They are also hand-coloured, offering maximum realism for professional model builders!

Already available at your local dealer and at www.noch.com.

H0 58315 Open-Air Staircase, curved
 20.5 cm x 10 cm x 3 cm

H0 58316 Open-Air Staircase, straight
 Contents: 2 pieces, 7.4 cm x 7.9 cm x 3 cm

Miniature Walls and Portals with a Realistic Concrete Look – Detailed, Lightweight and Ready to Use!

Concrete Walls and Portals made of Structured Hard Foam H0

NOCH Model Walls and Portals impress with their deceptively realistic concrete texture and fine details. Made from high-quality Structured Hard Foam, they offer the perfect combination of stability and ease of use. The material can be easily cut, sanded and customised – without the need for heavy tools. Each concrete wall and each concrete portal is realistically coloured

by hand and features the typical surface of real concrete formwork. They can be used to create authentic scenes on model railway layouts, dioramas and modern architectural projects in no time at all.

Expected release: November 2026

H0 58091 Concrete Portal
single track, 7.1 cm x 10.1 cm

H0 58092 Concrete Portal
double track, 13 cm x 10.1 cm

H0 58093 Concrete Wall
30 cm x 10.1 cm

H0 58094 Concrete Arcade Wall
open, 30 cm x 10.1 cm

H0 58095 Concrete Arcade Wall
closed, 30 cm x 10.1 cm

Looking for the Right Tools?

The NOCH range includes a suitable Modelling Fine Saw (ref. 60066), File Sets (ref. 60076) and Superglue (ref. 61106). From page 36 onwards, we present these and many other helpful tools.

Craft Tip: Advantages of NOCH Hard Foam Walls and Portals

Hard foam is a very versatile and lightweight material with a super realistic surface. It is very easy to cut and carve with a saw or a craft knife. You can heat up the material with the help of a heat gun and shape it through careful bending.

Hard foam pieces can be attached with hot-melt adhesive or contact glue. Once they have been installed in the landscape, you can decorate the portals and walls in the desired colour with NOCH Acrylic Sprays and Acrylic Paints.

A Shining Moment in Model Making

micro-motion Observatory H0

In keeping with the 2026 focus theme 'Future Dreams', we venture a glance at the stars and present

an extraordinary highlight in the form of the limited edition micro-motion Observatory. The detailed model is based on the original in Tübingen and combines technical sophistication with charming features.

At the touch of a button, the small planet projector displays the moon in all its glory on the ceiling of your model-making room. What a sight! Shortly afterwards, the striking dome is set in motion by a motor. The space telescope raises and lowers – a fascinating spectacle that brings your miniature world to life.

Another highlight are the exclusive 3D figures of great personalities from astronomy and physics: Isaac Newton, Galileo Galilei, Albert Einstein, Erwin Schrödinger, Stephen Hawking and Vera Rubin – accompanied by a lively and a dead cat, as a tongue-in-cheek homage to Schrödinger's famous thought experiment.

The kit consists of precisely laser-cut cardboard parts and 3D-printed parts. The projector and micro-motion drive are ready to connect and can be connected to a standard 16 V model railway transformer. Suitable for direct and alternating current. The model is limited to 1,000 pieces. A numbered certificate, detailed assembly and connection instructions, and special laser-cut adhesive are included with the kit.

Expected release: November 2026

Highlights:

- Planet Projector for very special effects
- micro-motion drive: rotating dome with movable telescope
- Large roof terrace as an attractive destination for excursions
- Exclusive 3D figures set of famous scientists
- Includes 'lively' and 'dead' cats as a humorous detail
- High-quality Laser-Cut and 3D-printed parts
- Limited to 1,000 pieces
- Numbered certificate included

Video clip

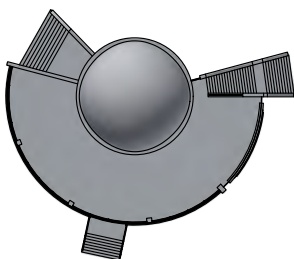

Manufactured with great attention to detail, the micro-motion Observatory is not only a technical gem, but also a small monument to the great thinkers.

**In line with the 2026
focus theme 'Future Dreams'**

- Planet Projector
- micro-motion drive for dome and telescope
- 6 exclusive, colour-printed figures with 2 cats
- Numbered certificate
- Detailed instructions
- Special Laser-Cut Adhesive

Attention, Train Arriving!

Laser-Cut Kit Platform Roof H0

NEW

The width of the Platform Roof is perfectly matched to the NOCH Laser-Cut Universal Platforms (refs. 66008 and 66010). However, with a few simple adjustments to the kit, the canopy can also be easily adapted for use with the narrower hard foam platforms (refs. 66012 and 66020). Practical markings on the laser-cut sheets show exactly where the supports and roof need to be shortened to create the narrow version. This makes conversion a breeze and guarantees a perfect fit! Detailed assembly instructions and suitable adhesive are included in the kit.

Expected release: October 2026

H0 66413 micro-motion Christmas Market Pyramid
4.5 cm x 4.5 cm, 9 cm high
installation depth 4 cm

There's Some Extra Movement in Your Christmas Festivities!

Christmas market pyramids are becoming increasingly popular. With the NOCH Laser-Cut Wooden Kit, you can add another highlight

to your model railway Christmas market. The pyramid rotates at a realistic speed. Both the impeller as well as the figures and decorations arranged in three storeys rotate. The candles are produced as 3D-printed parts.

The included electronics are connected to a 16V model railway transformer and are suitable for AC and DC power connection. Suitable adhesive and detailed assembly instructions are included.

Already available at your local dealer and at www.noch.com.

Perfectly Integrated! The NOCH easy TRACK Helix

Track helices are the most elegant solution for moving trains safely and space-savingly from one level to the next. They make invisible routes such as shadow stations or bridging large differences in height on small layouts possible in the first place.

The NOCH easy TRACK Helix will replace the LAGGIES Helix in future. This means that everything in the easy TRACK system now fits together perfectly, from Railway Route Kits and Track Helix to individual components.

Expected release: October 2026

What is a track helix?

A track helix is a spiral-shaped track section on which the train continuously travels uphill or downhill to overcome a difference in height. The even and moderate gradient ensures that trains run safely and can also bridge several levels in a confined space, for example to reach a lower-lying staging yards.

When is a track helix needed?

Track helices are always used when a direct ramp is too steep or too long. Typical applications include connecting hidden staging yards under the layout, connecting visible levels of different heights, e.g. in mountainous landscapes, or designing longer routes for realistic train operation.

The new NOCH easy TRACK Helix System

The NOCH easy TRACK Helices are based on the proven previous system, but have been modified to fit perfectly into the NOCH easy TRACK system. Supports and tracks are now 100% compatible, so NOCH easy TRACK Kits can be expanded without any problems.

The perfect addition to easy TRACK

The easy TRACK track kits already provide well-designed track layouts that greatly simplify the process of building layouts. With the new track helix, model railway enthusiasts can now easily expand

these kits with individual additions such as additional levels or complete staging yards without having to plan their own complicated gradient and track constructions.

Construction and material

The tracks of the new easy TRACK Helices are made of warp-free MDF boards that remain dimensionally stable and durable. In combination with the precisely fitting supports, this results in dimensionally stable, low-vibration spirals that ensure smooth running of the trains and a high level of operational safety. The MDF material used is the same thickness as the tracks in the easy TRACK kits and individual components, so there are no steps between the components. This effectively prevents disruption to train operation.

For new and long-standing NOCH customers

Beginners will find it easy to get started with multi-level layouts thanks to the new easy TRACK Helices, as they come with a fully thought-out system that does not require any complex DIY construction. Customers who are already familiar with NOCH Helices can integrate their existing layouts into the easy TRACK system step by step and use the new possibilities to design additional staging yards, routes and much more according to their wishes.

Which product do I need? Basic Helix or Add-On Helix?

First of all, it is important to know what height difference needs to be bridged.

The Basic Helix is suitable for bridging an entire level from the zero level.

The Add-On Helix is required if you need to go one more 'floor' higher. In principle, you can place any number of extension circles on a base circle to achieve the height to be bridged.

The heights of the respective constructions can be found in the product detail information.

I would like to use a 'large' radius as a single-track section; why can't I find any track helices in the range that are only single-track?

Since the outer diameter is always the limiting factor for all radii in the installation situation, we only offer double-track routes for reasons of simplification, with the exception of the smallest single-track radius. If you only want to use the 'large' radius, the inner circle simply remains unused in this case, but will disappear under the landscape later anyway.

Pro Tip:

If the inner circle is unused, you can use the space to build the landscape in the visible area. Or, if the track helix is hidden, you can create a branch line with suitable points. This opens up a hidden storage or sidings track, a kind of 'mini staging yard'.

I need a helix that I can enter from the opposite direction. Where can I find one?

All Basic and Add-On Helices can be accessed from the left and right. Simply assemble them in the opposite direction to the illustration shown here. The pillars and tracks included can be assembled in exactly the same way coming from the other side, achieving the same gradient and curve from the opposite direction.

Can I combine the easy TRACK Helix with an existing LAGGIES Helix?

Yes, it is possible to place an easy TRACK Add-On Helix on a LAGGIES Basic Helix and vice versa. However, due to tolerances in the plastic pillars, it may be necessary to either sand them down slightly if they are too tight or glue them in place if they are too loose. The tracks may also have slight tolerances that should be compensated for.

Can I drive my locomotive through the track helix with the pantograph extended?

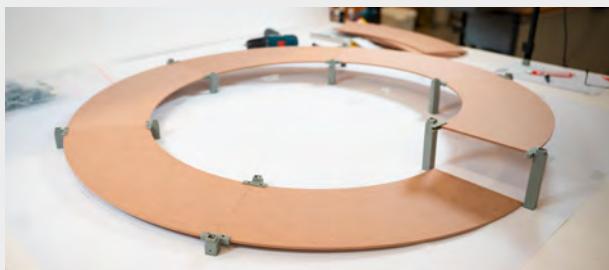

That depends on the locomotive and the pantograph used. The clearance height of the spiral is specified in the product details.

Craft Tip Assembling the NOCH easy TRACK Helix

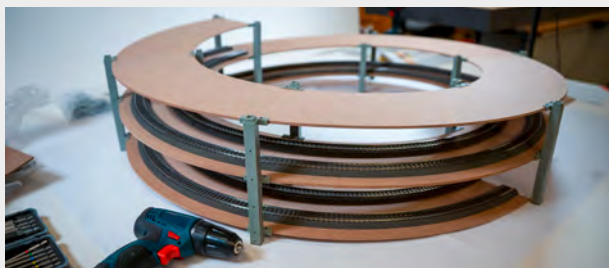

The Basic Helix is assembled directly on the enclosed plan. The base plates are fastened to the base plate with screws.

The circular segment tracks and pillars are assembled piece by piece.

The tracks are laid and secured.

With additional assembly circles, the helix can be easily extended upwards.

H0 easy TRACK Helix, Gauge H0

Basic and add-on helices are suitable for tracks from all well-known model railway manufacturers and track systems. Use the track radii as a guide to find the helix that best fits your project.

Basic Helix

Contents 1 circle incl. instruction manual	6 circular segment tracks, 12 pillars and segment holders, 24 screws	6 circular segment tracks, 12 pillars and segment holders, 24 screws

The Add-On Helix

The add-on helix comprises a full circuit. Any number of add-on helices can be added to a basic circle. This allows even large height differences to be overcome effortlessly in a very small space.

The Basic Helix

The Basic Helix comprises 1½ circles. A basic circuit provides the crossing height as well as the entry and exit sections.

Scope of delivery

Each basic helix contains 9 circle segment tracks, which can be used to build 1 ½ circles. Each assembly circle contains 6 circle segment tracks, which can be used to build 1 circle. The scope of delivery includes 12 or 24 (large radii H0) matching pillars with the

required segment holders and instructions. To make assembly easier, each base circle comes with a printed plan on a scale of 1:1.

The Practical Work Station – The Perfect Companion for the NOCH Gras-Master 4.0!

NEW

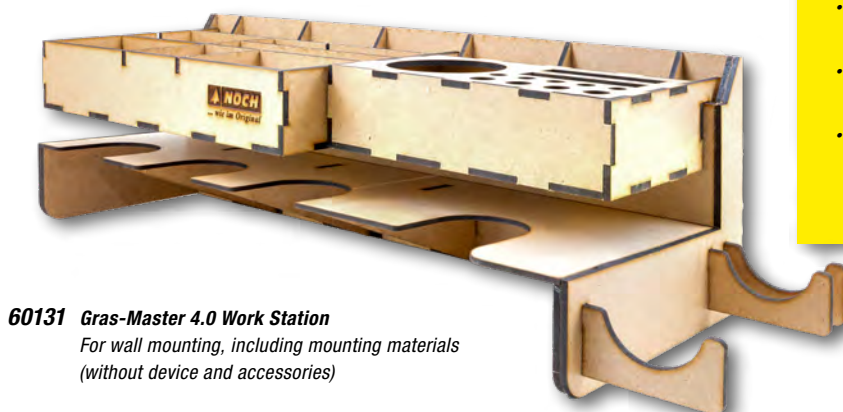

The Gras-Master 4.0 Work Station for the NOCH Gras-Master 4.0 and the NOCH Gras-Master 4.0 PROFI is made of robust MDF and is supplied as a kit. It can be securely mounted on the wall using the enclosed screws, plugs and discs to save space.

This makes working with the NOCH Gras-Master 4.0 even more fun!

Expected release: March 2026

Highlights:

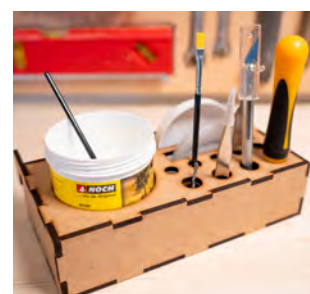

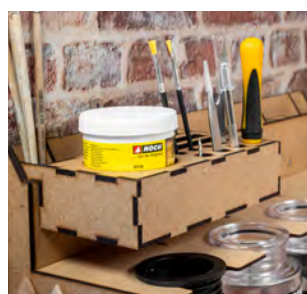

- Base shelf made of sturdy MDF
- 4 holders for change containers (1 suitable for XL Flock Change Container, 3 suitable for Flock Change Container or Detail Flocker)
- Gras-Master 4.0 handle holder
- Brush holder
- Storage box 1: storage of sieves and grass stamps
- Storage box 2: storage of grass glue, lid and brushes
- Mounting material included: 3 screws, discs and plugs

60131 Gras-Master 4.0 Work Station

For wall mounting, including mounting materials
(without device and accessories)

GRAS master 4.0

Note: Gras-Master, grass glue, change containers etc. are not included in the scope of delivery.

Finally: The Right Tool for Every Application!

NOCH Special Tool Set, 36 pieces

With the NOCH Special Tool Set, you always have everything you need to hand for your favourite hobby with your favourite brand. The contents of the set have been compiled by the professional modellers at NOCH and are therefore ideal for processing the various NOCH handicraft articles. The set includes cutting tools such as sharp scalpels, the matching NOCH cutting mat, a metal ruler and a fine saw. A fine side cutter for plastic, various files and abrasives,

a hand drill, tweezers, small bottles for colours, brushes, a NOCH pencil and lots of accessories round off the set. The tools are quickly stowed away in the matching tool bag and are therefore always ready to hand for the next job!

Expected release: March 2026

60050 NOCH Special Tool Set, 36 pieces

Contents:

- 1 cutting mat 220 mm x 150 mm, 2 mm thick
- 1 metal ruler, 150 mm
- 1 side cutter for plastic parts
- 3 files
- 1 double-sided modelling tool
- 1 fine scalpel
- 6 blades for scalpel
- 3 flexi sanding pads 90 mm x 19 mm, 6 mm thick
- 1 tool handle
- 1 scalpel blade for tool handle
- 1 fine saw blade for tool handle
- 1 hand drill
- 5 drill bits (1.0, 1.2, 1.4, 1.5 and 1.8 mm)
- 1 pair of straight tweezers
- 1 pair of curved tweezers
- 3 resealable vials, 10 ml
- 3 flat brushes, 6 mm
- 1 pencil
- 1 tool bag with zip fastener

Contents:

The Perfect Tool Set for many Applications Suitable for the NOCH Products!

Laser-Cut

Using the scalpel, you can easily cut the components from the cardboard carrier along the metal ruler on the NOCH cutting mat. It also allows you to precisely cut transparent Film into matching windows.

Hard foam

The fine hand saw is ideal for cutting NOCH hard foam parts to size. Various files and abrasives are included in the set to smooth the cut surfaces.

Plastic modelling

The fine side cutter is suitable for cutting out plastic parts from moulded model kits. The burrs can then be removed or smoothed with the abrasives.

Planting trees

A classic in the NOCH range: the fir trees with planting pin. For even easier planting in future, use the small hand drill. With the five drill bits from 1.0 to 1.8 mm, you can also use the drill for fine work on models and buildings.

Planting grass tufts

The two tweezers not only make it easier for you to insert and attach fine parts to buildings and models, but they are also suitable for planting the popular NOCH grass tufts.

Colour

The three resealable bottles are ideal for mixing, diluting and storing individual colours. Also included: three simple brushes.

NOCH Superglue

Ideal for quick and permanent bonds. Perfect for bonding figures, laser-cut parts and many other materials. The adhesive dries very quickly and transparently, so that the bond is not visible. The resealable bottle ensures easy and economical dispensing. A reliable adhesive for hobbies, modelling and repairs – fast, clean and strong.

Already available at your local dealer and at www.noch.com.

61106 Superglue
Contents: 20 g

This Makes the Work Even Easier!

NEW

NOCH Tools

Discover NOCH's range of tools specially designed for model railway enthusiasts. Whether you need a precision scalpel with replacement blades, flexible sanding pads for perfectly deburred parts, practical pipettes and bottles for precisely dosed paint applications, and much

more. Here you will find the tools you need for your creative model building projects.

Already available at your local dealer and at www.noch.com.

60060 Softgrip Scalpel
incl. blade

The scalpel has a non-slip softgrip handle. The sharp blade enables precise cuts, e.g. for cutting window film and removing laser-cut components.

60061 Spare Blades, 5 pieces
for scalpel

Suitable for NOCH Softgrip Scalpel (ref. 60060).

60065 Modelling Scissors
stainless steel

With these sturdy Modelling Scissors, you can cut NOCH Lake Film, Landscape Crepe Paper, road foil and much more with precision. Not suitable for aluminium mesh.

60066 Modelling Fine Saw
incl. 2 saw blades, coarse and fine

The fine saw can be used to cut hard foam parts, e.g. walls and portals, as well as wooden struts from the NOCH Terra-Form System. Includes one coarse and one fine saw blade.

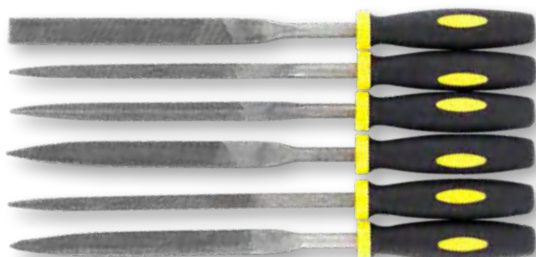

60067 Saw Blade, coarse
for fine saw, 12.7 cm, 210 teeth

Coarse saw blade with 210 teeth. Ideal for cutting materials such as wood, plastic and hard foam to length.

60068 Blade, fine

for hand saw, 12.7 cm, 270 teeth
Fine saw blade with 270 teeth. Ideal for making fine, precise cuts with fine edges in visible areas. Suitable for wood, plastic and hard foam.

60076 File Set, 6 pieces
different shapes

The fine model files in various shapes are suitable for metal, plastic and wood. They can also be used to easily rework NOCH hard foam parts.

60079 Flexi Sanding Pad Set, 3 pieces (coarse, medium, fine)
each 9 cm x 1.9 cm x 0.6 cm

The Flexi Sanding Pads are flexible and therefore adapt easily to the workpiece. They are washable with water and reusable. Each Flexi Sanding Pad has two different sides: coarse (60 and 100 grit) for removing material, medium (240 and 400) for sanding, and fine (600 and 1,000) for finishing and polishing.

60086 Modelling Side Cutter

The Modelling Side Cutter is suitable for plastic and fine wires. It can be used to easily separate plastic parts from a kit moulding and cut wires and cables to length.

60087 Flat-Nose Pliers with serrated edge

The Flat-Nose Pliers can be used to bend wires into shape.

60092 Precision Tweezers, straight

The Precision Tweezers can be used to attach small parts and position figures perfectly. The straight design makes it easy to pick up objects from above.

60093 Precision Tweezers, curved

The Precision Tweezers can be used to attach small parts and place tufts of grass perfectly in place. The curved design makes it easy to pick up objects from the side.

60099 Scriber, double-sided

The Scriber can be used to quickly and precisely draw marks in wood, plastic and soft metals. Unlike pencil marks, these marks cannot smudge and do not mix with the paint when painted over.

60100 Plastic Bottle with lid, 4 pieces

Volume: 17 ml

Ideal for mixing paints (e.g. from AMMO). The paint can be dripped directly from the bottle into an airbrush. Excess paint can be stored in the bottle thanks to the lid.

60101 Pipette, 5 pieces

Volume: 2 ml

The pipette can be used to pick up paints or adhesives (e.g. gravel adhesive) and then drip them into an airbrush, paint bottle or directly onto the material to be worked on.

60105 Nylon Clamp Set, 9 pieces

3 big, 6 small

The clamps are suitable for fixing parts, e.g. when two components of a kit are to be glued together.

The New Home Academy 'Railway Bridge on the River'

The Online Course for Every Level!

Have you been wanting to take part in a seminar for a long time, but time or geographical constraints have got in the way? Our online modelling course offers you the perfect solution! Learn how to create realistic landscapes for your model railway from the comfort of your own home – flexibly, effectively and at your own pace.

This course is aimed at both beginners and experienced modellers who want to develop their skills. In clearly structured lessons, experienced chief model builder Florian Giwanski will teach you

basic and advanced techniques. You will learn how to design your diorama with realistic colouring, professional grassing and the supreme discipline of water.

A key advantage of our online course is its flexibility: you have access to the course content at any time, which is provided exclusively via a private YouTube video. There are no fixed times and no travelling – you can start, pause and rewind the video at any time to complete the lessons at your own pace. This gives you the freedom to work intensively on each technique and go back to details you want to deepen at any time.

After booking the course, you will receive an exclusive set of materials delivered directly to your home. These materials have been carefully selected to give you the best possible start or further development in the hobby of model landscaping.

Start your model railway adventure today – conveniently, flexibly and without restrictions. Book now and get the complete modelling experience straight to your home!

Note: The online seminar is only available in German and may be booked online at www.noch.de. You will also need tools (see pages 36–39) and a NOCH Gras-Master (e.g. ref. 60125).

The New **SOLUTION BOX** for your Realistic Model Railway Landscape!

With the new **SOLUTION BOX** for your model railway landscape, both beginners and experienced model builders can paint a small scene precisely and age it realistically. The comprehensive complete set offers all the materials, adhesives and paints needed to extensively design the miniature scene with vegetation and natural ageing effects on tracks and accessories. To achieve the desired result, the **SOLUTION BOX** includes the **SOLUTION BOOK** specifically tailored to landscape design.

Already available at your local dealer and at www.noch.com.

The comprehensive **SOLUTION BOX** was developed for model building enthusiasts:

- Precisely matched colours and weathering products
- **SOLUTION BOOK**: 55 pages with instructions in 4 languages (DE, EN, FR, ES)
- Perfectly combinable with other NOCH and AMMO Rail Center products

4601203 (AMMO.R-1203)

SOLUTION BOX 'Railway Scenery'

All application-specific products

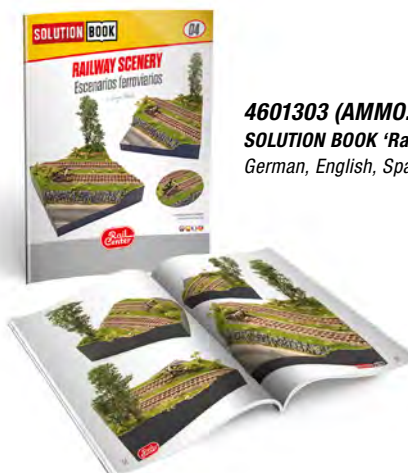

Scope of delivery:

- 1 **SOLUTION BOOK**
- 8 paints (5 acrylic, 1 thinner, 1 Dio drybrush, 1 shader),
- 3 effects, 2 adhesives, 1 acrylic texture, 1 fine cork ballast,
- 1 scatter grass, 1 Sculp-Tech hard foam sheet, 2 cork sheets

The **SOLUTION BOOK** for Realistic Modelling of your Model Landscape!

The **SOLUTION BOOK** 'Railway Scenery' is a helpful guide that is also available separately and provides tips and tricks for using AMMO Rail Center products on model landscapes. On 55 pages in 4 languages (DE, EN, FR, ES), you will learn everything you need to know about ageing and weathering model landscapes with AMMO Rail Center products!

Already available at your local dealer and at www.noch.com.

High-Quality Modelling Brushes!

The new selection of six high-quality brushes (round, flat, corner brushes) is specially designed for the diverse techniques used in model making! Whether priming, painting intricate details, dry brushing or applying complex weathering effects such as oil, rust and streaks – these brushes are the perfect addition to the design of locomotives, carriages, figures, buildings, structures and dioramas.

Made from high-quality synthetic fibres, AMMO Rail Center brushes impress with their outstanding elasticity and long service life. In addition, thanks to their solvent resistance, they are ideal for many types of paint (acrylic, enamel and oil paints).

Ideal for all modellers who want to achieve demanding results!

Already available at your local dealer and at www.noch.com.

The New Colours for Perfect Shading!

With ten new shaders in the most important shades, AMMO is expanding the Rail Center range with an innovative product for ageing and weathering models. The shaders are matt, highly fluid and transparent acrylic paints that have been specially developed

for shading and weathering effects. They make it particularly easy to achieve realistic results – both with an airbrush and with a brush.

Already available at your local dealer and at www.noch.com.

Oil Paints with Integrated Brush!

NEW

The popular oil brushes from the Solution Box are now also available individually. With ten carefully selected colours, they cover a wide range of realistic ageing effects. Specially developed for model railways, their integrated brushes allow direct and clean application without a palette or additional tools. This saves you time and

material, avoids sticky paint residues and achieves realistic effects on locomotives, carriages and accessories.

Expected release: April 2026

4602600 (AMMO.R-2600)
Black, Oilbrusher

Grease Black, Oilbrusher

4602609 (AMMO.R-2609)
Bare Metal, Oilbrusher

Acrylic Washes for Greater Depth and Realism!

Washes are one of the most important tools in the ageing process for models. They are diluted, mostly dark colours that are used to emphasise specific details such as dirt, rust, dust and shadows. A major advantage of acrylic washes is that they are odourless and dry

much faster than enamel washes, allowing ageing work to be completed in less time.

Expected release: April 2026

4602450 (AMMO.R-2450)
Brown, Acrylic Wash

4602451 (AMMO.R-2451)
Light Rust, Acrylic Wash

New Themed Colour Sets – the Perfect Choice for Every Application!

The new themed sets add two important areas to the range! The weathering set is the first set from AMMO Rail Center to contain a selection of washes, effects and pigments specifically for depots and tracks. The colour set contains matching acrylic paints from the range, enabling quick, realistic painting of tracks.

Expected release: April 2026

4603000 (AMMO.R-3000)

Depot Areas & Track Filth Weathering Set

3 washes, 1 effect, 1 pigment, each 35 ml

4603001 (AMMO.R-3001)

Railway Fast Method Paint Set

6 acrylic paints, each 15 ml

Missing Link – Brush Markers for Effective Ageing!

The 'Missing Link' brush markers are the ideal solution for quickly and easily adding realistic ageing and wear effects to your models. They have been specially developed for applying effects to already painted surfaces and are not suitable for primers. The set contains 12 high-quality water-based brush markers and a mixing marker for use with water.

This is what the brush markers were developed for:

- Easy blending & correction: with water or the included blender marker
- Realistic surfaces: semi-matt colours for natural transitions
- Intense colours: for more depth and realism
- Beginner-friendly & professional: easy to use, regardless of experience level

Expected release: April 2026

4601070 (AMMO.R-1070)

Missing Link, Trains Set

Contents: 12 brush markers including 1 brush marker each in faded green, dark green, light blue, faded yellow, orange, red brown, medium grey, black, earth, dirt, dark rust, rust, 1 mixed marker

Thinner for Your Paints – Now also Available in Large Containers!

The Japanese C11 Steam Locomotive!

NEW

The C11 #123 Steam Locomotive from ROKUHAN is a detailed Z gauge replica of the historic Tobu Railway SL 'TAIJU' steam locomotive. The compact locomotive features authentic lettering, finely reproduced smoke deflectors and characteristic details. Ideal for nostalgic museum and tourist trains on small layouts.

Model Features:

- Minimum radius: R195 mm
- With front lighting
- Head/train signs included

Expected release: April 2026

7297810 (ROKUHAN Art.-Nr. T019-10)
Steam Locomotive C11 #123 TOBU Railway 'TAIJU'

The Shinkansen Series 923 Dr. Yellow as a Z-Shorty!

The Series 923 'Dr. Yellow' is now available as a Z-Shorty from ROKUHAN. The Shinkansen monitored the condition of tracks, overhead lines and signalling systems on the Tokaido and Sanyo lines at high speed and is therefore known as the 'Shinkansen Doctor'. After its farewell run, the T4 train operated by JR Central was taken out of service in January 2025. The Z Shorty model shortens the train to about half its length, but retains the typical yellow paintwork and characteristic shape and can be operated like a normal Z gauge train with a separately available motor and trailer chassis.

Also available as a Starter Set: In addition to the individual item, the Shinkansen model is also available as a starter set. The starter

set includes an oval track (2 straight tracks 110 mm, 8 curved tracks R45 – 45°), an RC004 speed controller in a special colour, the Shinkansen housing and the corresponding motor and trailer chassis:

Model Features:

- Minimum radius: R45 mm
- Compatible with Shinkansen Motor Chassis #7297904
- Compatible with Shinkansen Trailer Chassis #7297906
- Z-Shorty Housing = shortened version

Expected release: April 2026

7298033 (ROKUHAN Art.-Nr. ST004-2)
Z-Shorty Series 923 Dr. Yellow 'T4'

7298034 (ROKUHAN Art.-Nr. SG002-2)
Starter Set, Z-Shorty Series 923 Dr. Yellow 'T4'

The ROKUHAN Z Gauge Range at a Glance

The ROKUHAN Z Gauge Brochure 2025 – only available in German – provides a comprehensive overview of the most important items in the ROKUHAN range. It includes product photos, technical data and further information on track systems, accessories, buildings and locomotives.

Already available at your local dealer and online at
www.rokuhan.de.

We are Celebrating our Anniversary – Join Us!

115 years of NOCH and 65 years at our headquarters in Wangen im Allgäu – in 2026, we will be celebrating two anniversaries and look forward to welcoming you!

On **Friday, 12 June, and Saturday, 13 June 2026**, we cordially invite you to our **open house** in Wangen.

An exciting programme awaits you:

- Take a **look behind the scenes** of our production facility in Wangen
- Discover fascinating, detailed dioramas and model railways
- Join in the crafting fun with a small **workshop**
- Get advice on the best solutions for your hobby in the NOCH model-making world
- Browse our **large flea market** for bargains
- Experience a **colourful children's programme** with entertaining activities, e.g. a small ride-on train

Come by, get to know the NOCH team personally and celebrate with us. We look forward to your visit!

Up-to-date information about the anniversary and the programme will soon be available on our website: www.noch.com
